

SFTV Sustainable Production Practices

SFTV is Going Green! [Click Here to Learn More!](#)

Physical production can generate a lot of waste that isn't good for the environment. SFTV is committed to bringing sustainable on-set practices and resources to students that will help reduce carbon emissions. If we each do our part, together we can make a difference.

STEP 1

BYO – Bring Your Own Water Bottle and Reusable Coffee Mug to set. Bring extras for cast/crew. Send reminders on your Call Sheet!

STEP 2

Use Brita Water Pitchers or Water Filter Dispensers on-set. Find Water Refill Stations on campus. #PlasticFreeProduction

STEP 3

Bring your unused, non-perishable craft service to COM 103, and we'll donate it to the LMU Pantry. Make your own coffee on-set.

STEP 4

Reduce what goes to landfill. Separate recyclables from everything else (food waste, utensils, trash).
